---

Derek and Joe:

Attached is a write up from Mike S. (Region 2 EPA) summarizing the incident and a signed 213RR with appropriate specifications, model numbers, accessories etc. to do an "in kind" replacement for lost asset.

Warren  
Bravo BD

The radio used by OCR Team 7 provided by Harris County was accidentally dropped into the ship channel while I was crossing over to the platform vessel to return to the decon-pad. It was attached to one of the clip attachment points on my backpack by the belt-snap-clip on the back of the radio. After I crossed over one of the crew handed over the backpack and the radio hit the side rail on the platform popping the clip causing it to fall into the water and sink before anyone could retrieve it. I do not believe that the crew member realized the radio was attached when he passed over the backpack.

I hope this is sufficient to get the Harris County folks' radio replaced.

Let me know????

MikeS

Subject: Radio info

David,

Here is the information on the radio that was lost in the water in the Houston Ship Channel:

Motorola APX 7000

S/N 562CPT1297

IFAS # 213-P212270-001-001

*Spec sheet has already been sent to you.*

Accessories:

1 ea. Belt Holder, Part # PMLN6102A

1 ea. Battery, Part #NNTN7033A

1 ea. Antenna, Part # PMAS4001A

1 EA. Lapel Microphone, Part # HMN4104B

My understanding is that the EPA is going to purchase a new radio and USCG CW03 R. Smith with the Gulf Coast Regional Response Team will be doing the field incident report.

Very Respectfully,

David R. Corbin, CSHO, ISO
